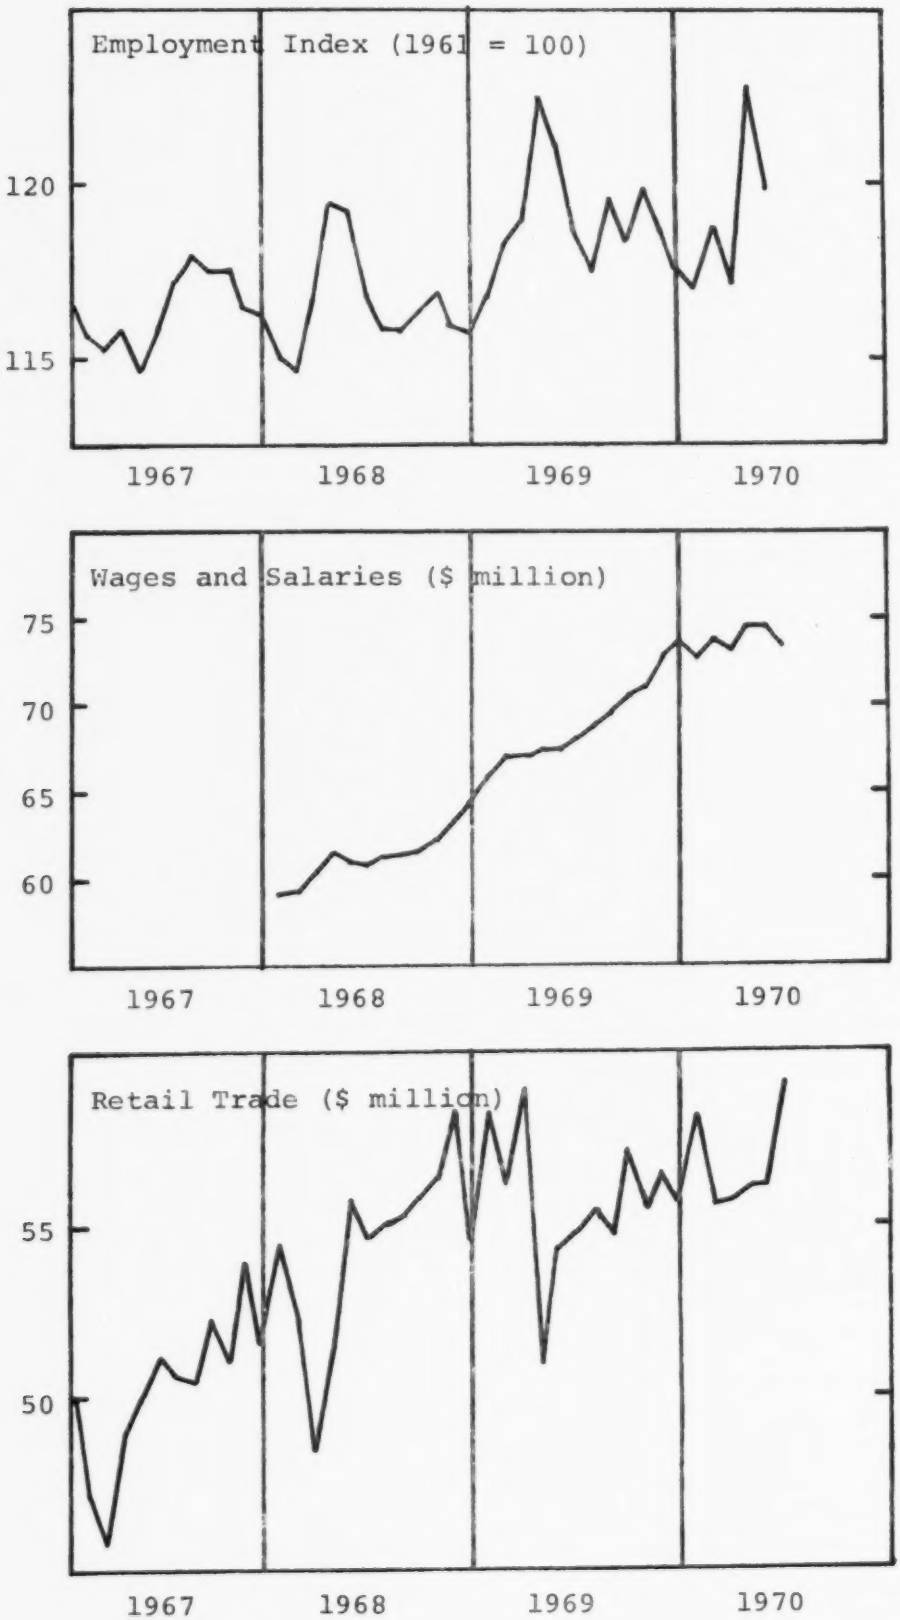
SEASONALLY ADJUSTED ECONOMIC INDICATORS
New Brunswick



THE NEW BRUNSWICK ECONOMY

Provincial incomes have continued to rise rapidly this year. Total wage and salry payments to New Brunswick workers in the January-June period were 9.6% above the 1969 level. This compares favourably with the average growth rate of 10.6% during the past three years. Average weekly wages and salaries rose 7.4% to $103.19. Based on trends during the first half of 1970, G.P.P. is expected to increase about 7% this year Price rises will account for about one-half of this gain. National output was 8% ahead of the first six months in 1969, 4.5% in real terms.

Unemployment over the January-August period of 1970 averaged 18,500 persons, about 2,000 persons fewer than in 1969. The unemployment rate fell from 9.5% in the eight-month period in 1969 to 8.7% this year, while the Canadian total went from 5.0% in 1969 to 6.1% in 1970. Provincial employment growth of 1.1%, or a monthly average of 2,000 persons, exceeded the increase in the size of the labour force. Employment increases were concentrated in the service sector, along with gains in construction and forestry.

The mid-year survey of investment intentions for 1970 anticipated a 7% increase in new capital spending this year in New Brunswick to a level of $420.5 million, compared to $393.2 last year. This represents an upward revision of $41.3 million from plans as formulated at the beginning of the year when a decline of 4% was forecast. Most of the upward revision took place in manufacturing and in the insitutions and government categories which are expected to increase $20 million and $28 million respectively over 1969 levels. Repair investment is expected to contribute another $120 million in spending for construction and equipment.

In the first quarter farm cash receipts exceeded $16 million for a 45% increase over the same period of 1969. Returns from animal products were 20% higher while potato receipts were doubled as prices improved as much as 50% above 1969 levels.

Seafish landings were down in the first half of the year as declining catches were reported for herring, lobster and crab. Reports for July and August have been delayed by the postal dispute, but early indications are that a good increase will be registered when tabulations are completed.

Puplwood production for domestic use was 31% ahead of 1969 after six months with all months ahead of last year.

With increases for five of the six months the value of manufacturing shipments was 1.3% above 1969. Pulp and paper production in the second quarter was about 2% ahead of 1969. Sawmills reported a decline of 14% after six months.

The generation and consumption of electricity was up about 8%.

Housebuilding activity and building permits issued were down from last year as the building construction industry continues to be restrained by high interest rates and other policies of fiscal and monetary restraint.

Retail sales were up only moderately during the first half of 1970 as consumer spending throughout North America generally continues to be depressed by anti-inflationary policies.

Recent months have seen considerable easing of economic activity in the face of anti-inflationary policies in Canada and the United States. In the second quarter the volume of output was only 0.2% above the first quarter. Prices trends have been moderating in recent months, an indication that economic policies are being successful. The increase in the G.N.P. price index was 0.5%, compared with 1.0 in the first quarter and 1.6 in the fourth quarter of 1969. Retail prices

have been rising at a less rapid rate in the Province as well as the Nation. The Consumer Price Index for Saint John in the second quarter of this year was 3.4% above a year earlier, compared to increases of over 4% since the first quarter of 1969.
